

GOLD STANDARD – Neutral Cleaner

Description

This product is a totally new concept in water based cleaner/degreasers. It is formulated to remove the toughest grease, grime and other industrial contaminants from virtually any surface without harm to the user or the environment.

It can be used on waxed floors, for regular maintenance without dulling or removing the wax. It is especially effective in automatic scrubbers on greasy, oily plant and warehouse floors.

Gold Standard's extremely neutral pH (7.0-7.6) makes it ideal for cleaning and maintaining marble and granite without the risk of dulling these highly polished surfaces.

This is an excellent choice for power washing fleet vehicles such as transit and school buses, emergency vehicles and passenger trains. It easily removes road film, tar and other contaminants without damaging or dulling the vehicle's finish.

It is a superior food processing detergent and is used to remove heavy build ups of protein fats and greases from walls, floors and equipment in food processing plants operating under USDA supervision. It can be used in any area that comes in contact with food during processing and rinses freely without leaving a film residue.

Features

- Neutral pH
- Phosphate Free
- EPA Voc Compliant
- Non-RCRA Regulated
- No Sara 313 Chemicals
- No Petroleum Distillates
- No Butyls or Glycol Ether
- Non- Hazardous, Non-Pollutant

Use And Directions

For use in any manual or pressure washing procedures. Dilute up to 2 oz. per gallon for all general cleaning requirements.

Physical Properties

Physical Form:..... Liquid	Specific Gravity: 1.006
Appearance: Clear	pH: 7.5-7.6
Color:.....Light Gold	Evaporation Rate (Water =1):..... 1
Fragrance:..... None	Flash Point: None to Boil
Water Solubility:.....Complete	VOC <.3%

GS:225 - 0806
