

## STEEL SHIELD - Ultra Durable Floor Finish

### Description

STEEL SHIELD floor finish is formulated with acrylic co-polymers and a high degree of metal cross-links to produce an extremely tough, buffable “wet look” finish, resulting in better looking floors with less maintenance requirements than conventional floor finishes. It can be maintained with conventional buffing or with high speed burnishing equipment.

It is extremely detergent, scuff and black mark resistant (22% Solids) yet easily removed with conventional wax strippers.

### Features

- Wet Look Finish
- Will Not Powder
- Easily Strippable
- Extremely Durable
- Detergent Resistant
- Clear And Transparent
- Black Mark And Scuff Resistant

### Use And Directions

See product label for complete directions. Strip old finish and apply 3-4 coats, initially, allowing adequate drying time between coats.

Dust mop daily with treated dust mop and damp mop with neutral detergent, as required.

Spray buff or burnish to renew “wet look” appearance.

### Physical Properties

Physical Form:.....Liquid	Specific Gravity:.....1.017
Appearance:.....Milky	pH:.....8.0-9.0
Color:.....Milky White	Evaporation Rate (Water =1):.....1
Fragrance:.....Slight Acrylic	Flash Point:.....Non-Flammable
Water Solubility:.....Complete
